(54) Title: SECURING DOSE QUALITY OF INHALABLE DRUG

(57) Abstract: A method and a device for making a metered dry powder medication dose, enclosed in a dose container, accessible for inhalation with a minimum of exposure to ambient atmosphere. The invention relates to a single dose inhaler, which is provided with a movable inhaler member, a so called slide, which has at least one matching receptacle adapted for receiving a selected type of dose container. The slide is movable between a first, protuding position, where the receptacle(s) is accessible for loading of a sealed dose container by a user, and a second, retracted position inside the inhaler.
