

Title of the Invention:

TRANSMISSION DEVICE, RECEPTION DEVICE, COMMUNICATION SYSTEM,
SIGNAL TRANSMISSION METHOD, SIGNAL RECEPTION METHOD, AND
COMMUNICATION METHOD

ABSTRACT

A transmission device of the disclosure includes: a clock signal transmitting circuit that outputs a clock signal onto a clock signal line; a data signal transmitting circuit that outputs a data signal onto a data signal line; and a blanking controller that controls the clock signal transmitting circuit to output a predetermined blanking signal, in place of the clock signal, from the clock signal transmitting circuit to the clock signal line in synchronization with a blanking period of the data signal.
