ABSTRACT

Embodiments of the present disclosure relate to a method and apparatus for determining a point of an audio, a device, and a product. The method comprises: obtaining an audio for generating a video, and determining a plurality of candidate points of the audio and a plurality of energies of the plurality of candidate points. In addition, the method further comprises determining a plurality of target points of the audio based on the plurality of candidate points and the plurality of energies, wherein the plurality of target points are configured to match images of the video.
