

METHOD OF PRODUCING CULTURE SOLUTION FOR HUMAN OR ANIMAL
CELL CULTURE

ABSTRACT

5 A technology that facilitates the control of iron
concentration in a culture solution for use in human or
animal cell culture is provided. A method of producing a
culture solution for human or animal cell culture includes
bringing an iron supply source (1) including an iron-
10 containing section (11) and a plating layer (12a, 12b)
provided thereon into contact with an aqueous medium to
supply iron from the iron supply source (11) to the aqueous
medium.
