(54) Title: A COATING PROCESS

(57) Abstract: A process for coating a hard disk housing component, the process comprising the steps of: dipping one or more hard disk housing components in a curable coating bath; and removing the components from said curable coating bath to form a curable coating on the surface of the components, wherein the orientation of the coated components is such that the coating drips from a single point of the component to allows excess coating to drip therefrom and form a substantially uniform coating thereon.
