

Baggage item with corner reinforcement

Abstract

In a baggage item (1), in particular a suitcase, having at least two baggage item portions (2, 4), wherein the baggage item portions (2, 4) each comprise at least one baggage item wall having at least one baggage item wall inner face (3, 5) and at least one baggage item wall outer face (7, 9), wherein at least one baggage item portion (2, 4) comprises at least one corner (32), it is intended that at the at least one corner (32) of at least one baggage item portion (2, 4) a corner reinforcement (14, 15) is provided at the baggage item wall inner face (3, 5).
