ABSTRACT

The method of preparation of a type of white emulsified scented crocodile oil includes the following: Prepare 70-85 parts of crocodile fats and put them into a boiler. Add in water in parts by weight of crocodile fats to water, in the ratio of 1:15. Place on low heat until boiled. Add in 5-10 parts of mucosal tissues; lower heat, and cook it in water for 15-18 hours. Cool down to room temperature. In a mixer, combine crocodile oil with water, plant essence and emulsifier in parts by weight, in the ratio of 1:1:0.5:0.5. Mix for 6 hours. Filter out oil dregs, and process through a high pressure homogenizer. The invention includes the addition of blood vessels and mucosal tissues of crocodiles, which contain a certain amount of protease that promotes skin whitening and effective healing. Through steaming, cooking, mixing, filtering and pressing, the fishy smell is effectively removed, and what remains is a a type of white emulsified scented crocodile oil extremely good for skin beautification, treatment of skin burns and scalds, and promotion of scar healing etc..
