CLAIMS

1. A composition comprising glycyrrhizin, hyaluronic acid or a salt thereof, and a viscosizing agent, wherein said viscosizing agent is tamarind seed polysaccharide, or said viscosizing agent comprises a mixture of tamarind seed polysaccharide, with one or more of PVP, carboxyvinyl polymers, xanthan gum, carboxymethylcellulose, hydroxyethyl cellulose, hydroxypropyl methylcellulose, mucopolysaccharides, cellulose and esters, natural gums and their esters, pectins, polyacrylates.

2. The composition of claim 1, wherein, in the composition, said glycyrrhizin is in concentration up to 5.0 wt%, preferably 0.05-3.0 wt%, based on the weight of the composition.

3. The composition of claim 1 or 2, wherein, in the composition, said hyaluronic acid or a salt thereof is in concentration up to 5.0 wt%, preferably 0.01-3.0 wt%, based on the weight of the composition.

4. The composition of any one of claims 1-3, wherein, in the composition, said viscosity agent is in a concentration up to 5.0 wt%, preferably 0.01-3.0 wt%, based on the weight of the composition.

5. The composition of any one of claims 1-4, wherein, in the composition, said viscosizing agent is tamarind seed polysaccharide, preferably in a concentration of 0.05-2.0 wt%, based on the weight of the composition.

6. The composition of any one of claims 1-5, wherein, in the composition, glycyrrhizin and hyaluronic acid or a salt thereof are in a weight ratio of 1:1 to 1:20, preferably 1:1 to 1:10, more preferably 1:1 to 1:5.

7. The composition of any one of claims 1-6, wherein, in the composition, glycyrrhizin and viscosizing agent are in a weight ratio of 5:1 to 1:15, preferably 3:1 to 1:10, more

preferably 2:1 to 1:5.

8. The composition of any one of claims 1-7, wherein, in the composition, hyaluronic acid or a salt thereof and viscosity agent are in a weight ratio of 1:2 to 10:1, preferably 1:1 to 5: 1, more preferably 1:1 to 3:1.

9. The composition of any one of claims 1-8, said composition having a pH of 4-7, preferably 5.5-6.5.

10. The composition of any one of claims 1-9, the composition further comprising a buffer, said buffer being selected from citric acid-sodium citrate, acetic acid-sodium acetate, boric-sodium borate acid, citric acid-disodium hydrogen phosphate (also known as' buffer McIlvaine'), citric acid-monopotassium phosphate-boric acid-diethylbarbituric acid, TRIS-borate, and their mixtures, preferably said buffer, is citric acid-sodium citrate.

11. An ophthalmic product comprising the composition of any one of the claims 1-10 and ophthalmologically acceptable excipients.

12. The ophthalmic product of claim 11, said ophthalmic product being a tear substitute, a collyrium, a suspension, an eye spray, a foam, an impregnated wipe, a spray patch, or a combination thereof, preferably being a tear substitute.
