(54) Title: DISK APPARATUS

(57) Abstract: In a disk apparatus (1), a disk tray (20) is provided with a plurality of movable holding members (24, 25, 41, 42) and a link (26, 43) which operatively associates the holding members (24, 25, 41, 42) with each other. The holding members (24, 25, 41, 42) are moved in synchronization with each other when the link (26, 43) is made to slide, going back and forth relative to a recess (21, 22) of the disk tray (20) so as to hold an outwardly-facing surface of the disk (2) at a peripheral end region thereof.
