(54) Title: FUEL SYSTEM

Figure 3

(57) Abstract: Disclosed is a fuel system (20) for an engine (4) of a marine vessel (1). The fuel system (20) comprises a settling tank (110) for cleaning fuel for the engine (4), and a service tank (130) for storing fuel for the engine (4). The fuel system (20) also comprises a filtration system (220) comprising a first filter (222) through which fuel flowing from the settling tank (110) to the service tank (130) passes. The filtration system (220) is configured to be operable in a first mode in which the first filter (222) removes contaminants from fuel flowing from the settling tank (110) to the service tank (130), and in a second mode in which fuel flows from the service tank (130) through the first filter (222) to dislodge the contaminants from the first filter (222).
