

ABSTRACT

The present disclosure provides, for example, a compound represented by general formula (6) below or a pharmaceutically acceptable salt thereof, or a pharmaceutically acceptable solvate of the compound or salt:

(6)

wherein X_1 , X_2 , X_3 and X_4 are each independently $\text{-CR}_2\text{=}$ or -N= , R_2 is, for example, a halogen atom, R_1 is, for example, $\text{-S(=O)}_2\text{-NH-R}_8$, R_8 is, for example, a C1-6 alkyl group, R_3 is, for example, a hydrogen atom, R_5 is, for example, a halogen atom, R_6 is, for example, a hydrogen atom, and R_4 is, for example, a cyclopropyl group. The compounds, salts or solvates provided by the present disclosure exhibit high RAF/MEK complex-stabilizing activity and can be used for the treatment or prevention of cell proliferative disorders, particularly cancers.
