

TITLE OF THE INVENTION

ASSET MANAGEMENT SYSTEM FOR FOOD CENTRE AND METHOD OF USING THE SAME

ABSTRACT OF THE DISCLOSURE

5

An asset management system for food centre or the like comprising

(a) a tray management system incorporated with an interface module, and including at least one tray returning station having a RFID reader;

10 (b) a point of sale (POS) system electronically linked to a plurality of POS machine in each of food stalls within a food court, wherein the plurality of trays are embedded with RFID for tracking, and the RFID reader detects the trays and the RFID reader functions to read the RFID on the tray and deactivates the RFID tray, is disclosed. The present invention also relates to a method of using the asset management system.
