WO 2025/196330 A1

(54) Title: POLYMER COMPOSITIONS FOR USE IN EMBOLOTHERAPY OR FOR THE PREPARATION OF INJECTABLE THERAPEUTIC DEPOTS

(57) Abstract: The invention relates to a composition for use in a method of embolotherapy and/or in the preparation of therapeutic depots for use by injection comprising: a) a tri-arm copolymer of hydroxyethyl methacrylate (HEMA), 3-hydroxypropyl methacrylate (HPMA) and N-isopropyl methacrylamide (NIPAAM); and b) a contrast agent, preferably iodinated. The invention also relates to a process for preparing an embolic composition or a therapeutic depot for use by injection comprising combining a tri-arm copolymer as described above, optionally in the form of an aqueous composition, with a contrast agent and a therapeutic product, and to a kit for the preparation of said embolic composition or therapeutic depot.
