

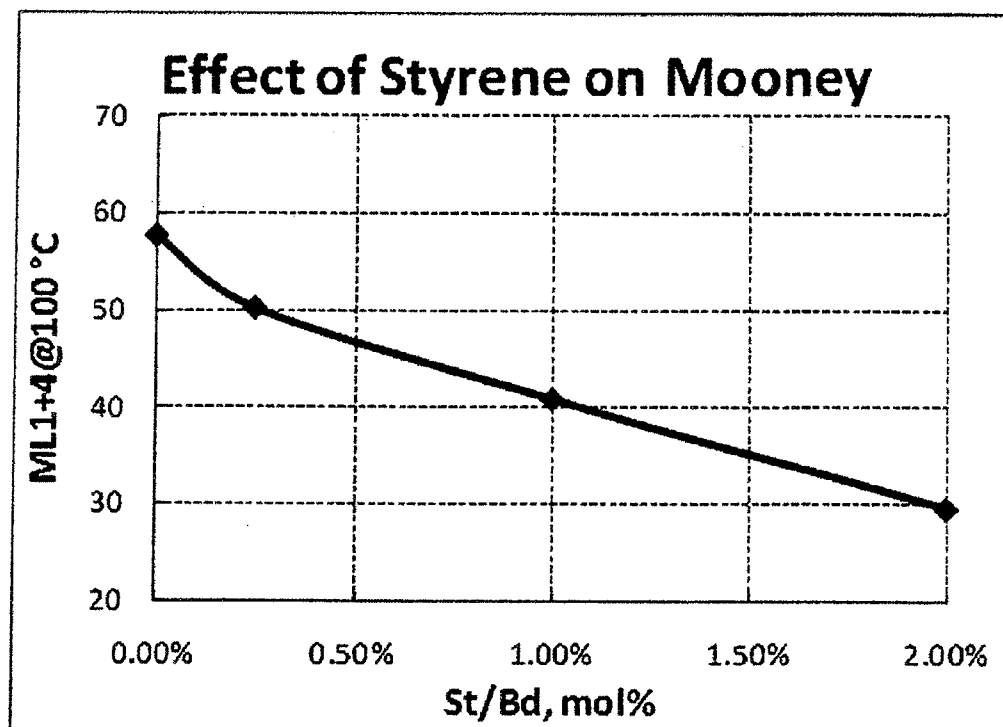

Figure 1: Effect of varying amounts of styrene on Mooney viscosity.

FIG 1

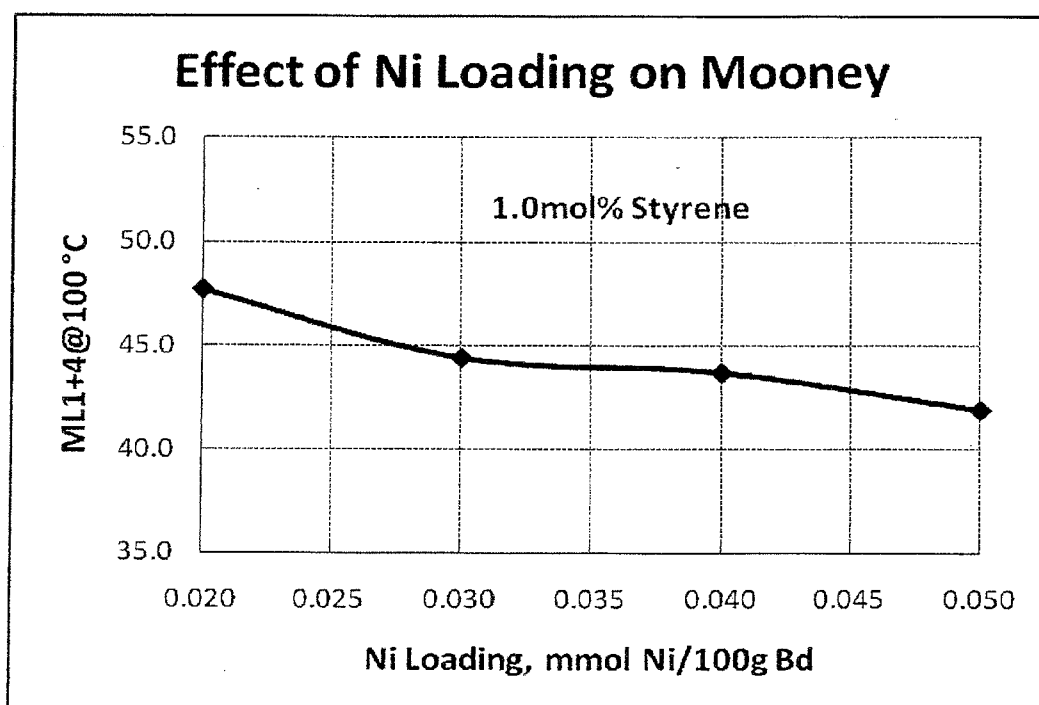

Figure 2: Effect of varying amounts of nickel-containing catalyst compound on Mooney viscosity, while using a constant amount of vinyl aromatic compound.

FIG 2

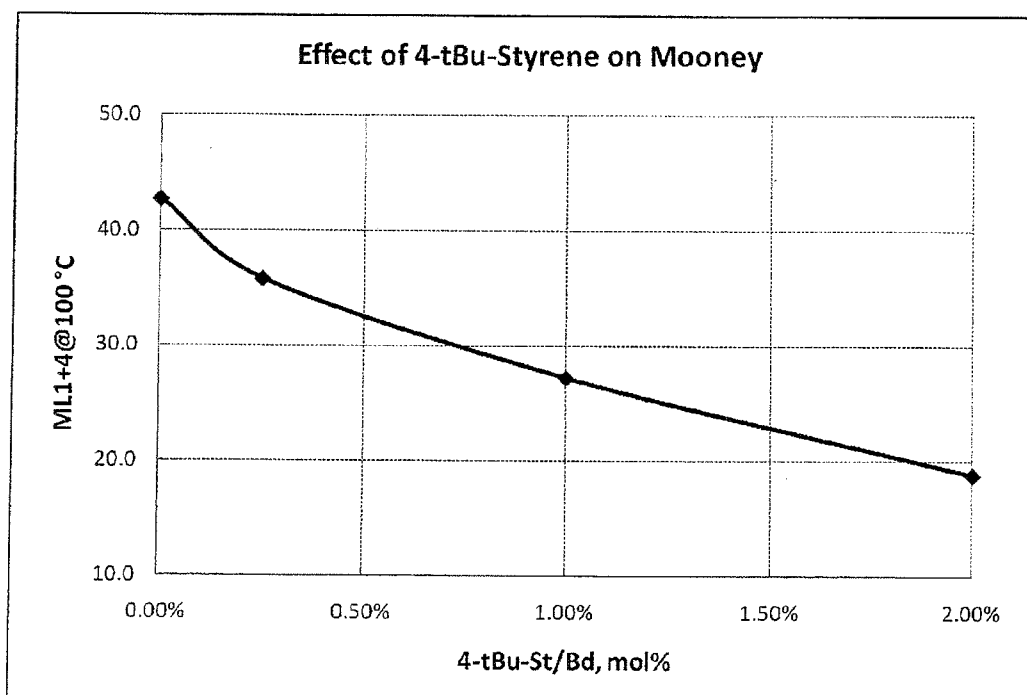

Figure 3: Effect of utilizing varying amounts of 4-tertbutylstyrene on Mooney viscosity while using a constant amount of catalyst.

FIG 3

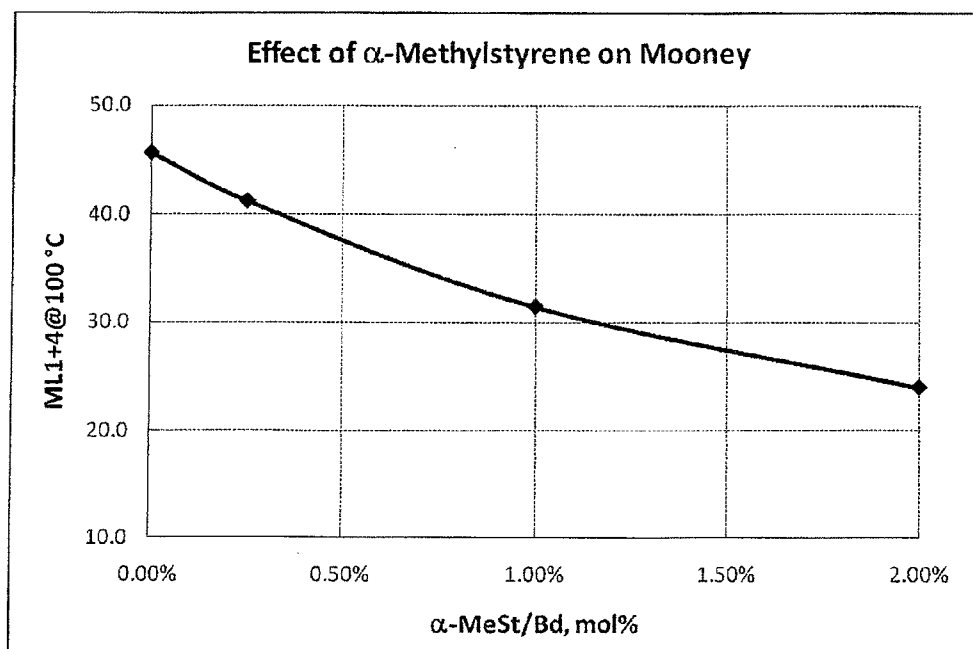

Figure 4: Effect of utilizing varying amounts of α -methylstyrene on Mooney viscosity while using a constant amount of catalyst.
