

INFORMATION PROCESSING APPARATUS, INFORMATION PROCESSING
METHOD, AND STORAGE MEDIUM

Abstract

5

This information processing device is provided with: a
setting unit for setting one or more tasks planned to be
executed during travel from a departure point to an arrival
point of an itinerary; a determining unit for determining, on
10 the basis of the departure point, the arrival point, and the
one or more tasks, an itinerary plan including one or more
travel means from the departure point to the arrival point,
and a task planned to be executed during travel by each
travel means; a predicting unit for predicting whether the
15 task being performed during execution of the itinerary plan
will end before the travel means arrives at a destination at
which it is planned to have arrived when the task ends; and a
modifying unit for modifying the itinerary plan in accordance
with the predicted result obtained by the predicting unit.
