(54) Title: BENT CAPILLARY TUBE AEROSOL GENERATOR

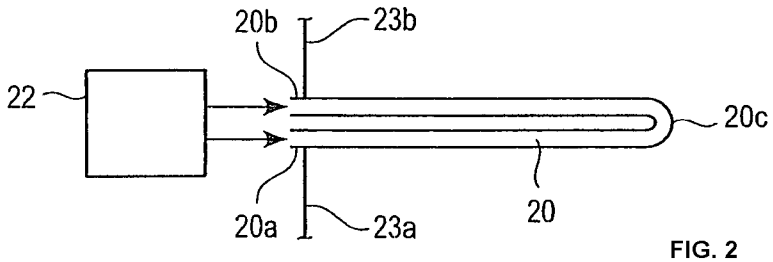

FIG. 2

(57) Abstract: An apparatus for generating aerosol comprises a capillary tube (20) including at least one bend, fluid inlets (20a, b), regions of reduced wall thickness located between the fluid inlets and the at least one bend, and an outlet (20c) along the at least one bend. The capillary tube is heated to a temperature sufficient to volatilize fluid in the capillary tube, such that the volatilized fluid discharges from the outlet to form an aerosol.
