(54) Title: METHOD FOR MULTI-LEVEL PROGRESSIVE JACKPOTS ON A BONUS WHEEL WAGERING GAME

FIG. 1

(57) Abstract: The device is a progressive jackpot system for a plurality of gaming machines. The progressive jackpot system includes at least one progressive jackpot with each progressive jackpot having an associated jackpot indicator based on color or symbols. The system includes a plurality of rotatable display wheels with a plurality of segments. Each wheel segment is adapted to display a numeric indicator and a first jackpot indicator. At least one win designator displaying a second jackpot indicator is positioned peripherally to each display wheel and each designator is adapted to indicate one of the segments as a selected segment. If the first jackpot indicator on the selected segment matches the second jackpot indicator of the win designator, then the system awards the progressive jackpot associated with the matching jackpot indicators as displayed on a progressive display. The first and second jackpot indicators may be changed intermittently by the associated gaming machines.
