

ABSTRACT OF THE DISCLOSURE

RESIN-SPRINKLING METHOD, RESIN-MOLDING METHOD, RESIN-SPRINKLING APPARATUS, RESIN-MOLDING APPARATUS, AND 5 PRODUCTION APPARATUS FOR RESIN-MOLDED ARTICLE

The present invention is to provide a resin-sprinkling method that can supply resin to a large circular area uniformly with a constant amount. The resin-sprinkling method of the present invention is a method of
10 sprinkling resin on a substantially circular resin-sprinkling area (inside of frame 12) on a release film 11. The resin is sprinkled by moving a drop point of the resin in a direction substantially coincident with a circumferential direction of the resin-sprinkling area while dropping the resin on the resin-sprinkling area.
