(54) Title: VALVE CONNECTOR FOR MEDICAL INFUSION LINES

(57) Abstract: Valve connector for medical infusion lines according comprising an external tubular body (1) with an inlet end (4) and an outlet end (6, 7), a hollow internal pin (2) and an intermediate elastic sealing member 3 comprising a head (13) with pre-slotting (15) and an elastic hollow element (14) abutted radially against the hollow pin (2). The hollow pin (2) has a closed terminal (9) shaped, as a result of the insertion of a fluid introducer (S) into the inlet end (4), in such a way as to make the elastic head (13) assumed an elastically deformed configuration without crossing the pre-slotting (15), which is opened to place in communication the inlet end (4) with the outlet end (6, 7) through lateral holes (12) of the hollow pin (2).

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
