

ABSTRACT

Shower jet outlet device and shower head equipped therewith.

5 A shower jet outlet device comprising a jet disk, which includes at least one jet disk opening, and comprising a jet outlet element disposed in the jet disk opening, and to a shower head including such a shower jet outlet device.

10 With the shower jet outlet device according to the invention, the jet outlet element is pot-shaped with an outlet-sided bottom, a side wall and a hollow chamber delimited by the bottom and the side wall, wherein the bottom is arranged facing in the jet outlet direction and includes a
15 plurality of fine jet openings. The bottom and the side wall of the jet outlet element are made of an elastic material and the jet outlet element is configured to deform by bulging of its bottom and/or its side wall, in response to a fluid
20 operating pressure present in the hollow chamber.
