

ATTENDANCE PROCESSING METHOD AND APPARATUS

ABSTRACT

5 An attendance processing method and apparatus are disclosed. The method may include: determining a preset attendance event corresponding to a group to which a user belongs (102); acquiring attendance-related information corresponding to the user in the preset attendance event (104), and presenting the attendance-related information to the user (106). This method may arouse the attendance enthusiasm of users and help improve user
10 experience.
