

INTERFERENCE SUPPRESSION METHOD AND APPARATUS, STORAGE MEDIUM, AND ELECTRONIC DEVICE

ABSTRACT

5

The present disclosure provides an interference suppression method and apparatus, a storage medium, and an electronic device. The method includes: calculating angle ranges of a shaped beam from a first base station to a first terminal, and calculating interference parameters of the first base station and a second base station; determining whether the first terminal is a target terminal according to the angle ranges of the shaped beam and the interference parameters; and if the first terminal is the target terminal, prohibiting the first base station from scheduling the first terminal.
