(54) Title: ACTUATOR PIN GUIDE FOR A FASTENER DRIVING TOOL

Fig.2

(57) Abstract: In a fastener-driving tool (10) equipped with a fastener magazine (26), and a power source (14) including a reciprocating driver blade (50) for driving fasteners obtained from the magazine into a workpiece, and a reciprocating valve sleeve (16) actuated by a cage (18), a nosepiece (40) is provided, including a nosepiece body (42) configured for attachment at one end to the fastener tool and defining a fastener channel (48) constructed and arranged for receiving the driver blade and the fasteners sequentially fed by the magazine, the fastener channel having a fastener outlet (46). A unitary actuator (52) reciprocates relative to the nosepiece body, has a first end (54) contacting the workpiece, and a second end (56) engaging the cage.
