(54) Title: FORMULATIONS OF ION CHANNEL MODULATORS AND METHODS OF PREPARATION AND USE OF ION CHANNEL MODULATORS

(57) Abstract: The present invention is directed to, in part, compositions or dosage forms comprising fused heteroaryl compounds useful for preventing and/or treating a disease or condition relating to aberrant function of a voltage-gated, sodium ion channel, for example, abnormal late/persistent sodium current. Methods of treating a disease or condition relating to aberrant function of a sodium ion channel including neurological disorders (e.g., Dravet syndrome, epilepsy), pain, neuromuscular disorders, trigeminal autonomic cephalalgia (TAC), migraine, cranial neuropathy or multiple cranial neuropathy, and cortical spreading depression (CSD)are also provided herein. In another aspect, the present invention provides a method of making ion channel modulators.
