(54) Title: IDENTITY VERIFICATION AND ASSOCIATED PLATFORM

(57) Abstract: Exemplary embodiments described herein include generating a Web3 identity using a user's root legal identity. The digital residency platform and verification system and methods associated therewith include a blockchain-native digital residency platform that bridges the privacy and security of Web3 identity with the capabilities and validity of global sovereignties. Exemplary embodiments of this first Web3 identity platform may be generated using end-to-end encryption enabling users to have control over their data and identity exposure. Exemplary embodiments may leverage non-fungible tokens (NFTs) as decentralized identifiers (dTD) document's and zero knowledge proofs (ZKPs).
