(54) Title: MEDICAL SPECULUM

FIG. 9

(57) Abstract: A medical speculum includes a first unitary body, a second unitary body, a handle cover, and a latch body. The first unitary body includes a lower bill a forward handle portion that are integrally formed. The second unitary body is rotatably coupled to the first unitary body and includes an upper bill, an actuator, and a locking lever that are integrally formed. The handle cover defines a rearward handle portion coupled to the forward handle portion to enclose an interior volume of a handle. The latch body includes a latch body including a locking receiver configured to engage the locking lever, and a lock. The actuator and the locking member are configured to be manipulated to change a position of the upper bill relative to the lower bill. Related systems, kits, and articles of manufacture are provided.
