(54) Title: OFFLINE SALES EXECUTION SYSTEM

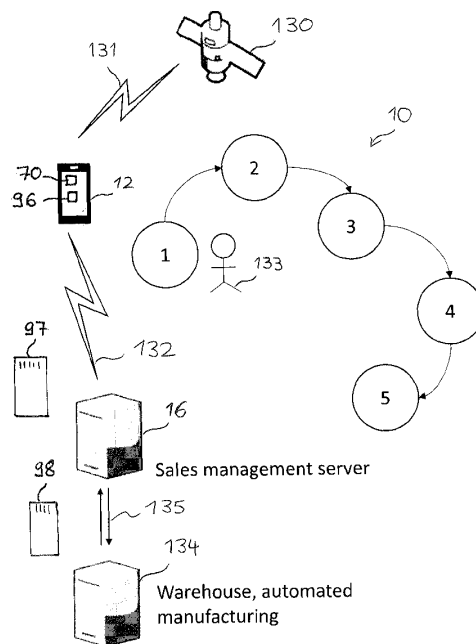

Fig. 22

(57) Abstract: An interaction execution system with an interaction application for installation on a client device for deriving an actual location of the client device, receiving user interaction data indicating a user interaction with an interaction partner at a pre-determined location. The actual location of the client device is compared with the pre-determined location of the user interaction and an automated message is generated if a mismatch between the actual location of the client device and the pre-determined location of the user interaction is detected.
