

ABSTRACT

ELASTOMER DRYING METHOD, ELASTOMER MANUFACTURING METHOD, ELASTOMER DRYING APPARATUS, AND ELASTOMER MANUFACTURING SYSTEM

Provided are an elastomer drying method and a drying apparatus capable of preventing elastomer powder from being attached to an inner surface of a wall of a drying chamber. An elastomer drying method according to the invention dries elastomer while an inner surface of a wall 30a is wet by spraying water from a spray nozzle 40 to the inner surface of the wall 30a facing an orienter 10 in a drying chamber 20. Further, an elastomer drying apparatus according to the invention includes a drying chamber 20 into which in-process elastomer 12 is input and which dries the elastomer 12 therein and water spray means for spraying water from a spray nozzle 40 to the wall 30a facing the orienter 10 in the drying chamber 20 so as to wet the wall 30a.
