(54) Title: METHOD, CLIENT DEVICE, SERVER SYSTEM FOR PARSING A DATA USAGE VALUE

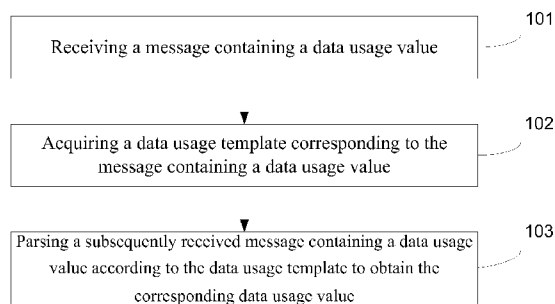

Fig. 1

(57) Abstract: The method is performed as a client device and includes receiving a first message that includes a first data usage value. The first message is formatted according to a respective format. After receiving the first message, the method further includes acquiring a data usage template corresponding to the respective format. The method further includes receiving a second message that includes a second data usage value. The second message is formatted according to the respective format. The method further includes parsing the second message according to the data usage template so as to obtain a second data usage value.
