

SYSTEM AND METHOD FOR PRICING ATTENDED REMOTELY HOSTED CONFERENCE SESSIONS

ABSTRACT

A system and method for pricing attended remotely hosted conference sessions is provided. The method comprises receiving a request for a cost of an attended remotely hosted conference session; obtaining data providing an evaluation of the attended remotely hosted conference session; analysing the evaluation data using an algorithm configured to process the evaluation data to determine a conference session score; calculating the cost of the attended remotely hosted conference session using the conference session score; and responding to the request with the cost of the attended remotely hosted conference session.
