(54) Title: TABLE AND SEATING ARRANGEMENT

(57) Abstract: A table and seating arrangement includes a tabletop defining a longitudinal direction and having an edge. A frame mounts to an underside of the tabletop and includes risers and laterally extending portions. Casters or wheels mount to the frame and provide for easy rolling transport of the table and seating arrangement. Seating assemblies having two stools mount to the framework on linkages that provide for moving the seats from a use position with the seats extended beyond the edge of the tabletops and engaging the ground to a storage position wherein the seats are raised and retracted to be inward from the edges of the tabletop.
