(54) Title: PELLET-TYPE FOAMS OF NON-CROSSLINKED POLYPROPYLENE RESIN HAVING LOWER MELTING POINT AND PROCESS AND DEVICE FOR PRODUCING THE SAME AND MOLDED FOAMS THEREFROM

(57) Abstract: The present invention relates to a pellet-type non-crosslinked polypropylene foam having a melting point of 125 to 140°C, and a process and device for producing said foam. Since the pellet-type foams of non-crosslinked polypropylene of the present invention has a lower melting point and a closed cell content of 80% or more, it is advantageous to mold such foams. The present invention also relates to an article molded from the above pellet-type non-crosslinked polypropylene foams.
