(54) Title: TRUSTED IDENTIFICATION OF ENROLLING USERS BASED ON IMAGES AND UNIQUE IDENTIFIERS ASSOCIATED WITH SPONSORING USERS

(57) Abstract: Provided is a method for providing trusted identification of an enrolling user. The method may include communicating a unique identifier to a sponsor device of a sponsoring user. Image data associated with an image of an enrolling user may be received from the sponsor device, and the image data may include the unique identifier. The first image data may be recorded in a ledger. An edge may be generated in a tree based on the first image data and the first unique identifier, and the edge may connect a first node associated with the sponsoring user to a second node associated with the enrolling user. A trust score for the second node may be determined based on a respective trust score of each node (including the first node) connected to the second node by a respective edge. A system and computer program product are also disclosed.
