(84) Designated States (unless otherwise indicated, for every
kind of regional protection available): ARIPO (BW, CV,

(54) Title: KAPPA LIGHT CHAIN-BINDING CONVECTION MATRIX

(57) Abstract: The present invention relates to isolation and separation of kappa light chain-containing proteins. More specifically it relates to a separation matrix comprising kappa light chain-binding ligands covalently coupled to a porous support, wherein said kappa light chain-binding ligands comprise, consists essentially of, or consists of multimers of alkali-stabilized *Finexgoldia magna* (formerly *Peptostreptococcus Magnus*) Protein L domains; and said porous support is a convection-based chromatography matrix.
