

Abstract of the Disclosure

A process for printing textile fibre materials in accordance with the ink-jet printing process, wherein the fibre materials are printed with an aqueous ink comprising

a) at least one reactive dye of formulae (1a) to (1i) indicated in claim 1

and

b) 1,2-propylene glycol or N-methyl-2-pyrrolidone.

The process is suitable especially for printing cellulosic fibre materials. The prints obtained have good fastness properties while having a high colour yield.
