(54) Title: STABILIZING FORMULATIONS

(57) Abstract: Formulations are described that are suitable for storage of proteins, such as antibodies, over a relatively broad range of protein concentrations, pH, and buffer types. Also described are methods of storing a protein and methods of identifying a suitable formulation for storage of a specific protein. In general, a formulation contains low to no surfactant, no to relatively low salt concentrations, and requires a relatively low buffer concentration.
