(54) Title: INFORMATION OUTPUT APPARATUS

(57) Abstract: To realize a user-friendly medium and information output thereof by defining a plurality of information in the same region of a dot pattern printed on a surface of a medium, such as a map or the like, and selectively outputting the information through an imaging operation of an imaging unit. [Means for Resolution] A dot pattern that is printed on a medium to be superimposed on a map or the like includes coordinate information and code information. Therefore, information corresponding to the coordinate information and information corresponding to the code information can be selectively and repetitively output.
