Fig. 1B

Responses of CD8 T cells to different forms of Us6

All proteins were expressed in E. coli

Results are interferon-gamma spot forming units per 200,000 T cells (CD4+ or CD8+) seeded per well of Elipot plate

306t: Us6 protein without transmembrane (TMR) or cytoplasmic region

dTMR: Us6 protein without transmembrane (TMR) region

Us6: full-length Us6 protein
