(54) **Title:** RECEPTION DEVICE, RECEPTION METHOD, TRANSMISSION DEVICE, AND TRANSMISSION METHOD

[Fig. 4]

FIG. 4

(57) **Abstract:** Provided is a reception device, a reception method, a transmission device, and a transmission method, in which a service package unit uses one or a plurality of components and a control signal constituting a specific service among a plurality of services included in the broadcasting wave of digital broadcast by using an IP transmission mode to package in units of a service by using IP an address included in each packet, and performs a predetermined process, thereby being flexibly adaptable to various operation forms in the digital broadcast using the IP transmission mode. The present disclosure is adaptable to, for example, a television set.
