

ABSTRACT

A search method, a search device, a storage medium and a computer program. The search method comprises: determining a first similarity between text and at least one video, the text being used for representing a search condition (S101); determining a first character interaction graph of the text and a second character interaction graph of the at least one video (S102); determining a second similarity between the first character interaction graph and the second character interaction graph (S103); and according to the first similarity and the second similarity, determining a video matching the search condition from the at least one video (S104).
