

Compound 51 has Superior HIV-1 Polymorphism Coverage to Bevirimat

Compound 51 has Superior HIV-1 Polymorphism Coverage to Compound C

Extrapolation of Bevirimat Normalized IC_{50} Values to 100% Human Serum

Beverimat IC_{50} extrapolation to 100% human serum = 22,558 nM (2,310-fold change)

Extrapolation of Compound B Normalized IC₅₀ Values to 100% Human Serum

Compound B IC₅₀ extrapolation to 100% human serum = 82.0 nM (17-fold change)

Extrapolation of Compound 51 Normalized IC_{50} Values to 100% Human Serum

Compound 51 IC_{50} extrapolation to 100% human serum = 0.33 nM (0.5-fold change)
