(54) Title: HANDLING SYSTEM FOR A WEAPON PLACED ON A TURRET

(57) Abstract: A handling system for a weapon (2) placed on a turret, said weapon being provided with a barrel (21) from which the bullets are shot and with a handle (22) through which the operator determines the traverse of the weapon itself. Said weapon is mounted on a circumferential fifth wheel comprising a fixed portion (31) integral with the turret and a movable portion (32) on which the weapon itself is mounted, in order that the movable fifth wheel rotates on the fixed one, permitting the movement of the weapon along the circumference (C).
