

ABSTRACT

ABSORBENT MATERIAL AND METHOD OF MANUFACTURE THEREOF

5

An absorbent material including: a first layer comprising a hydrophilic non-woven fabric; and a second layer comprising a hydrophobic film, the second layer arranged adjacent to the first layer; wherein the first layer is adapted to allow a first fluid and a second fluid to pass through; and wherein the second
10 layer is adapted to allow the first fluid to pass through and is adapted to minimize or block the second fluid from passing through.
