G00002

(57) Abstract

The invention relates to polycyclic thiazolidin-2-ylidene amines and the physiologically acceptable salts and physiologically functional derivatives thereof. Disclosed are polycyclic thiazolidin-2-ylidene amines of formula (I), wherein the radicals mentioned have the meanings as cited. The invention also relates to the physiologically acceptable salts and to a method of production thereof. The compounds can be used as anoretics.

(57) Zusammenfassung

Die Erfindung betrifft polycyclische Thiazolidin-2-yliden Amine sowie deren physiologisch verträgliche Salze und physiologisch funktionelle Derivate. Es werden polycyclische Thiazolidin-2-yliden Amine der Formel (I), worin die Reste die angegebenen Bedeutungen haben, sowie deren physiologisch verträglichen Salze und ein Verfahren zu deren Herstellung beschrieben. Die Verbindungen eignen sich z.B. als Anorektika.
