

ABSTRACT

The present disclosure relates to the technical field of computers. Provided are an interaction method and apparatus, and a device, a storage medium and a product. The interaction method comprises: displaying, on a preset page, a comment information set and a comment summary information set that correspond to a target live video interface, wherein a single piece of comment summary information is determined on the basis of a plurality of pieces of comment information in the comment information set that belong to the same preset category, and the plurality of pieces of comment information are posted by viewer users within the target live video interface; displaying corresponding preset controls at first associated positions of the comment summary information; and in response to a trigger operation for a target preset control, triggering a preset event for first target comment summary information, wherein the target preset control belongs to the preset controls, and the first target comment summary information is comment summary information corresponding to the target preset control. By using the technical solution, the processing efficiency for comment information of a preset category can be improved.
