USE OF SUBSTITUTED CYCLOPROPANE ACID DERIVATIVES FOR PRODUCING DRUGS FOR USE IN THE TREATMENT OF METABOLIC SYNDROME

Abstract

The invention relates to the use of substituted cyclopropane acid derivatives and their physiologically acceptable salts for producing drugs for use in the treatment of metabolic syndrome. According to the invention, the compounds of formula (I), wherein the substituents are defined as indicated, and their physiologically acceptable salts are used for producing a drug for treating metabolic syndrome.
