

Abstract

The present invention relates to an aqueous microcapsule dispersion liquid containing a component (A) and a component (B) below, a method of producing an aqueous microcapsule dispersion liquid, and a method of stabilizing an aqueous microcapsule dispersion liquid: component (A): microcapsules having a shell containing an inorganic material as a constitutional component, and a core containing one or more kind of an organic compound, inside the shell, and component (B): one or more kind selected from the group consisting of an amino acid (B1), a polyhydroxyamine (B2), and a quaternary ammonium hydroxide (B3).
