(54) Title: BROADCAST RECEPTION APPARATUS, BROADCAST RECEPTION SYSTEM, AND PORTABLE INFORMATION TERMINAL

(57) Abstract: Data of a data broadcast received by a television receiver (10) is reproduced at a desired time by a portable information terminal (14) powered by a secondary battery. The television receiver (10) has a slot (18) having a data transmitting terminal and a battery charging terminal therein. When the portable information terminal (14) with the secondary battery included therein is inserted in the slot (18), the secondary battery is charged through the battery charging terminal, and data supplied through the data transmitting terminal is stored into a data storage in the portable information terminal (14). The data stored in the data storage can be reproduced on a liquid-crystal display unit (12) of the portable information terminal (14) while the portable information terminal (14) is being carried by the user.
