(54) Title: SYSTEM, METHOD, AND COMPUTER PROGRAM PRODUCT FOR TRACKING FUNDS TRANSFERS

FIG. 1

(57) Abstract: Systems, methods, and computer program products for tracking funds transfers are provided. A system includes at least one processor of an administrative node in a blockchain network, the at least one processor programmed to establish a unified ledger stored by a plurality of nodes of the blockchain network, receive transaction data for a plurality of transactions processed by a plurality of different systems via an interoperable protocol while each transaction of the plurality of transactions is being processed between at least two systems of the plurality of different systems, store, in the unified ledger, the transaction data, and automatically monitor the transaction data in the unified ledger to detect anomalous transactions.
