(54) Title: SEALS FOR DOCK LEVELLING SYSTEMS, METHODS OF SEALING GAPS IN DOCK LEVELLING SYSTEMS,
AND METHODS OF ARRANGING SEALS FOR DOCK LEVELLING SYSTEMS FOR STORAGE OR TRANSPORTATION

Fig. 6

(57) Abstract: A seal for a dock levelling system comprising a movable ramp arranged within a recess. The seal is for sealing a gap between a side of the movable ramp and a wall of the recess, and comprising a flexible strip formed of a flexible material, and on each longitudinal edge of the flexible strip, an attachment strip for attaching the flexible strip to the side of the movable ramp. The seal is arranged so that when the attachment strips are attached adjacently to each other to the side of the movable ramp, the material of the flexible strip between the attachment strips forms a closed loop extending out from the side of the movable ramp to the wall of the recess, to seal the gap between the side of the movable ramp and the wall of the recess.
